Railroad	Nonvisible Boundary	Glacier
Modals	Inset	Out Area

When international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries. For example, a boundary coinciding with a county boundary and a state boundary with a MCD, $A^{1/2}$, indicates that the place is also a false MCD; the false MCD name is not shown.

2. The number of the tribal census tract boundaries and numbers within the subject entity: nontribal census tract boundaries are shown outside of the subject entity, and tribal census tract boundaries are shown within the subject entity. A tribal tract defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on an American Indian high-density census tract is shown within the reservation or off-reservation trust lands cross state or county boundaries, the same as a nontribal census tract map. A tribal census tract map is shown within the reservation or off-reservation trust lands cross state or county boundaries, and, if so, constitutes a single tribal census tract entity.

3. A number in the block number indicates that the block number is repeated elsewhere in the block.
